## CERTIFICATIONS

### Azure Solutions Architect Expert

Microsoft · 2025–2027

### AWS Solutions Architect – Associate

Amazon Web Services · 2024–2027

## EDUCATION

### M.Sc. IT & Management

University West · 2017

### M.Sc. Serious Games

University of Skövde · 2016

Cloud Architect with 10+ years of software engineering experience specialising in Azure, AWS, and cloud-native design. Proven track record of building automated, resilient systems — from distributed backend services to AI-driven workflows — while enabling teams to move fast and deliver boldly. Combines deep engineering craft with strategic vision.

## PROFESSIONAL EXPERIENCE

### Cloud Architect

May 2025 – Present

Epical · Gothenburg, Sweden

- Design and implement cloud architecture strategies for enterprise clients, driving adoption of Azure best practices.
- Lead migration and modernisation initiatives, reducing infrastructure costs while improving reliability and scalability.
- Advise on cloud-native patterns including microservices, serverless, and AI-driven automation workflows.

### Senior Software Engineer

Aug 2022 – May 2025

Polestar · Gothenburg, Sweden

- Architected and built distributed backend services on AWS, enabling real-time vehicle connectivity for a global EV fleet.
- Spearheaded event-driven architecture adoption using Enterprise Service Bus and EventBridge, improving system decoupling and throughput.
- Designed microservices with Domain-Driven Design and integrated AI-powered analytics into platform services.

### Software Engineer Lead

Jun 2018 – Aug 2022

Volvo Cars · Gothenburg, Sweden

- Led a team of engineers delivering customer-facing web applications and internal platforms using Angular, and .NET.
- Drove migration from on-premises infrastructure to Azure, establishing cloud governance and landing zone standards.
- Implemented Elasticsearch-based analytics pipelines and Power BI dashboards for stakeholder reporting.

### SharePoint Architect

Jan 2017 – Jun 2018

NEVS · Trollhättan, Sweden

- Designed and deployed enterprise SharePoint solutions, streamlining document management and collaboration across the organisation.
- Developed custom integrations and workflows that automated key business processes.
- Provided technical leadership on intranet modernisation, improving collaboration and information discovery.
